## UI Specification — Page by Page

Site map · Design system · Every page: sections, components, actions, states · Wireframes · Copy guide

Version v1.0 · 5 September 2026 · Status: Baseline (for front-end build)

### Version History

| Version | Date             | Author                              | Summary of changes                                                                                                                                            |
|---------|------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| v1.0    | 5 September 2026 | Founder (with AI-assisted drafting) | Initial baseline: site map, design system, page-by-page specifications for public, buyer, creator, vendor and admin areas, wireframes, states and copy rules. |
| v1.1    | —                | —                                   | (reserved) After first 30 real orders: revise checkout, OTP and tracking copy from support messages.                                                          |
| v2.0    | —                | —                                   | (reserved) Campaign Board, creator dashboard v2, reviews, referral, occasion pages.                                                                           |

### Scope of this document

Front-end only. It lists every page in the system, what appears on it from top to bottom, the components used, the one primary action, and the loading / empty / error states. Back-end behaviour is defined in *Technical Architecture v1.0*; this document only references the order states and roles defined there. Wireframes are low-fidelity by intention — layout and hierarchy, not visual design.

Reading order for a developer: Section 2 (design system) → Section 3 (shared components) → the pages you are building → Section 9 (states and copy).

# 1. Site Map and Roles

Five areas, four roles. Public and buyer pages are mobile-first (85%+ of traffic). Creator and vendor dashboards are mobile-first with a desktop layout. Admin is desktop-first (founder on a laptop) with a usable mobile view for queues.

Figure 1 — Site map. Arrows show the main navigation paths; every page is also reachable from its area's navigation.

| Area    | Auth                                      | Nav pattern                                                                     | Device priority | Page count (v1) |
|---------|-------------------------------------------|---------------------------------------------------------------------------------|-----------------|-----------------|
| Public  | None                                      | Top header (logo, search, language, cart) + footer                              | Mobile          | 10              |
| Buyer   | Phone OTP (passwordless); session 30 days | Same header; 'My orders' via phone icon                                         | Mobile          | 7               |
| Creator | Email + password (+ optional OTP)         | Bottom nav on mobile (Home · Orders · Picks · Payouts); left sidebar on desktop | Mobile          | 7 (+1 v2)       |
| Vendor  | Email + password                          | Bottom nav (Today · Orders · Products · Money); sidebar on desktop              | Mobile          | 7               |
| Admin   | Email + password + OTP                    | Left sidebar, 3-column dashboard                                                | Desktop         | 10              |

## 2. Design System

| Token group      | Values                                                                                                                                                                    | Usage                                                                                                  |
|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|
| Colour — brand   | Navy #1B3A5C (headers, text emphasis) · Teal #00796B (primary actions, money-positive) · Cream #FAF7F2 (page background on public pages) · White surfaces                 | Teal is the only button colour for primary actions; navy never used for buttons                        |
| Colour — state   | Amber #F9A825 'waiting on you' · Blue #1565C0 'in progress' · Green #2E7D32 'done / paid' · Red #C62828 'problem' · Grey #5B6B7A 'inactive'                               | Status chips, timeline dots, dashboard badges. Identical mapping to the order state machine everywhere |
| Typography       | Inter (Latin) · Noto Sans Sinhala · Noto Sans Tamil, loaded per active language. Scale: 12 / 14 / 16 / 20 / 24 / 32 px. Body 16 px on mobile, 15 px on desktop dashboards | Never below 12 px. Money always tabular-nums, 20–32 px on dashboards                                   |
| Spacing & radius | 4 px grid; component padding 12/16; page gutter 16 px mobile, 24 px desktop. Radius 8 px cards, 999 px chips, 12 px buttons                                               | —                                                                                                      |
| Elevation        | Flat with 1 px #E2E8F0 borders; shadow only on sticky bars and modals                                                                                                     | Low-end Android renders borders faster than shadows                                                    |
| Breakpoints      | ≤ 640 mobile · 641–1024 tablet · ≥ 1025 desktop                                                                                                                           | Public pages designed at 390 px first                                                                  |
| Touch            | Min tap target 44 × 44 px; primary button full-width on mobile, 48 px tall                                                                                                | —                                                                                                      |
| Iconography      | Lucide icons, 20 px, stroke 1.75                                                                                                                                          | Always paired with a text label except in bottom nav (label under icon)                                |
| Imagery          | Product 4:5 ratio; maker story 16:9 video / 1:1 photo; WebP ≤ 120 KB; blur-up placeholder                                                                                 | Vendor photos shot by founder in consistent natural light                                              |
| Language         | EN / SI / TA toggle in header; persists in cookie; product text in vendor's language with optional translations; UI strings all three                                     | Sinhala/Tamil copy written natively                                                                    |
| Motion           | 150 ms ease-out for state changes; skeletons not spinners; no page-transition animation                                                                                   | Battery and bandwidth                                                                                  |

### 3. Shared Component Inventory

| Component           | Where used                                                  | Content / variants                                                                                                  | Notes                                                             |
|---------------------|-------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------|
| AppHeader           | All public + buyer pages                                    | Logo · search icon (expands) · language toggle · cart with count · 'My orders' (phone icon)                         | Sticky; 56 px; collapses search on scroll                         |
| BottomNav           | Creator, vendor (mobile)                                    | 4 items, icon + label, active state teal                                                                            | Hidden on desktop → Sidebar                                       |
| ProductCard         | Home, category, storefront, search                          | Image 4:5 · title (2 lines) · price · VerifiedBadge · maker district · optional 'Picked by @name' chip              | Whole card tappable; no separate button                           |
| VerifiedBadge       | Product cards, product page, vendor pages                   | ✓ Verified Maker (teal outline chip); tap → 'What verified means' sheet                                             | Never shown on unverified content (there is none)                 |
| CreatorBanner       | Product page, cart, checkout (when ref cookie/code present) | Creator avatar · 'Picked by @name' · code chip                                                                      | Persists across checkout; dismissible but re-appears next session |
| StatusChip          | Tracking, all dashboards, admin tables                      | Text + colour from state mapping; sizes sm/md                                                                       | Text always present (no colour-only meaning)                      |
| OrderTimeline       | Tracking page, order detail (all roles)                     | Vertical steps Placed → Confirmed → Packed (photo thumb) → Shipped → Delivered; branches for RTO/Cancelled/Disputed | Times shown in Asia/Colombo                                       |
| NumberCard          | All dashboards                                              | Label · large number (tabular) · comparison line ('vs last week +12%') · optional teal/amber/red accent             | Max 4 per row on desktop, 2 on mobile                             |
| QueueButton         | Admin, vendor, creator dashboards                           | Count + label; tap opens filtered list                                                                              | Amber when count > 0                                              |
| PhotoCapture        | Vendor pack flow, buyer dispute                             | Camera-first on mobile; preview; retake; compresses client-side to ≤ 1600 px                                        | Required before 'Mark packed'                                     |
| MoneyLine           | Statements, order detail                                    | Label left, amount right, tabular; deductions in grey with minus                                                    | Explains every deduction                                          |
| PayoutCountdown     | Creator + vendor dashboards, Earn page                      | 'Next payout Fri 16 Sep · in 4 days'                                                                                | Trust component; always visible                                   |
| OtpInput            | Checkout confirm, buyer login, admin login                  | 6 boxes, auto-advance, paste support, resend timer                                                                  | Numeric keyboard                                                  |
| AddressForm         | Checkout, buyer profile                                     | Name · phone · address line · district (select) · city · landmark (optional)                                        | District drives shipping fee estimate                             |
| EmptyState          | Every list                                                  | Illustration · one sentence · one action button                                                                     | See Section 9 for copy                                            |
| Toast / InlineError | Everywhere                                                  | Success toast 3 s; errors inline under the field, never only as toast                                               | Error names the fix                                               |
| DataTable (admin)   | Admin lists                                                 | Filters row · sortable columns · row click → drawer · bulk actions                                                  | Desktop only; mobile shows cards                                  |

## 4. Public Pages (mobile-first)

Figure 2 — Low-fidelity wireframes: Home, Product, Checkout, OTP confirmation, Tracking, Creator storefront.

### Home / v1

**Purpose:** Establish trust in 5 seconds and route the visitor to a niche, an occasion or a creator's picks.

| Section (top → bottom) | Content and components                                                                                                                                            |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| AppHeader              | Logo · search · EN/SI/TA · cart · my orders                                                                                                                       |
| Hero                   | One sentence value proposition ('Verified makers. Trusted picks.') + current occasion banner (e.g., 'Avurudu Hamper Drop — order by 9 Apr'); one CTA 'Shop gifts' |
| Trust strip            | 3 icons + labels: Verified makers · COD with OTP confirmation · Colombo next-day delivery. Tapping opens 'How it works' sheet                                     |
| Shop by need           | Category tiles: Gifting hampers · Personalised (from M4) · Natural beauty (from M7); 'Under LKR 3,000' quick filter                                               |
| Creator picks          | Horizontal scroll of ProductCards with 'Picked by @name' chips; 'See all creators' link                                                                           |
| Meet the makers        | 3–4 vendor story cards (photo/video thumb, name, district, one-line story) → vendor page                                                                          |

| Section (top → bottom) | Content and components                                                                                               |
|------------------------|----------------------------------------------------------------------------------------------------------------------|
| How CeylonPick works   | 3 steps with icons: Pick → We confirm by OTP → Maker packs (photo) and courier delivers. Founder photo + 2-line note |
| Join                   | Two cards: 'Earn with CeylonPick' (creators) · 'Sell with us' (makers)                                               |
| Footer                 | Policies · WhatsApp support · payout calendar link · social · language                                               |

**Primary action:** Shop gifts (hero) / tap a ProductCard | **States:** Skeleton cards while loading; no empty state (curated content always present)

Home is server-rendered and cached (ISR 10 min). No carousel autoplay. First viewport must contain hero, trust strip and first category tile at 390 px.

## Category /c/{category} · v1

**Purpose:** Let a buyer scan 20–50 curated SKUs quickly and filter by price/occasion.

| Section (top → bottom) | Content and components                                                                 |
|------------------------|----------------------------------------------------------------------------------------|
| Header + breadcrumb    | Category name · count · short 1-line description                                       |
| Filter chips           | Under 2,000 · 2,000–5,000 · 5,000+ · Prepaid-only items · Sort (Popular / New / Price) |
| Grid                   | 2-column ProductCards; infinite scroll to 50 then 'Load more'                          |
| Maker spotlight        | Every 8 cards, one full-width vendor story card                                        |
| Footer                 | —                                                                                      |

**Primary action:** Tap ProductCard | **States:** Skeleton grid · Empty: 'Nothing here yet — makers are being verified. See gifting →' · Error: retry

Filters are URL parameters (shareable, cacheable).

## Product /p/{slug} · v1

**Purpose:** Convert: show enough trust and clarity that a first-time buyer places a COD or prepaid order.

| Section (top → bottom) | Content and components                                                                                                                                                         |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Top bar                | Back · share (copies link with current ref code) · cart                                                                                                                        |
| CreatorBanner          | Shown only when ref cookie or code present: 'Picked by @name · code NIMALI10 applied'                                                                                          |
| Gallery                | 3–5 images, swipe, pinch zoom; first image always product on plain background; optional 15 s clip                                                                              |
| Title block            | Title · price (LKR, tabular) · VerifiedBadge · 'Made in {district} by {maker}'                                                                                                 |
| Delivery block         | 'Colombo & suburbs: next day · Fee LKR 300 · Cash on delivery available' (from district cookie or default). Prepaid-only items show 'Made to order — prepaid, ready in 5 days' |
| Variants & quantity    | Chips for variants; stepper for qty (max 5)                                                                                                                                    |
| Actions                | Buy now (teal, full width) · Add to cart (outline)                                                                                                                             |
| Maker story            | Photo · 3 lines · 'Watch 45 s' → inline video; link to vendor page                                                                                                             |
| Details                | Accordion: Description · Ingredients/Materials · Care · Returns (damaged or wrong item only, photo within 48 h)                                                                |
| More from this maker   | Horizontal ProductCards                                                                                                                                                        |
| Sticky bottom bar      | Price + Buy now, appears after scrolling past actions                                                                                                                          |

**Primary action:** Buy now | **States:** Skeleton gallery/title · Out of stock: button disabled 'Notify me on WhatsApp' · Error: retry

Everything above the fold at 390 px: gallery, title block, delivery line, Buy now. Description is below the fold by design.

## Creator storefront /@{handle} · v1

**Purpose:** Give creators one link for their bio; convert their followers with the creator's own voice.

| Section (top → bottom) | Content and components                                                                                                        |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| Profile header         | Cover · avatar · name · handle · follower count (self-declared, verified quarterly) · 'Founding Creator' badge · social icons |
| Bio                    | 1–2 lines written by creator                                                                                                  |

| Section (top → bottom) | Content and components                                                                                    |
|------------------------|-----------------------------------------------------------------------------------------------------------|
| My picks               | 2-column ProductCards; each with creator's 1-line 'Why I love it' under the card; drag-ordered by creator |
| Code strip             | 'Use code NIMALI10 at checkout' with copy button (also auto-applied by visiting)                          |
| Latest video           | Embedded TikTok/Reel (lazy)                                                                               |
| Join CTA               | 'Want a storefront like this? Earn with CeylonPick'                                                       |

**Primary action:** Tap a pick | **States:** Empty (new creator): 'No picks yet' with hidden state for public; creator sees editor prompt  
Visiting sets the 30-day attribution cookie. OG image is generated per creator (name + 3 products) for link previews in WhatsApp/Instagram.

## Search /search?q= · v1

**Purpose:** Find a product or maker by name.

| Section (top → bottom) | Content and components                                                |
|------------------------|-----------------------------------------------------------------------|
| Search field           | Autofocus; recent searches; suggestions: products, makers, categories |
| Results                | ProductCards grid; 'Makers' section above when a vendor name matches  |

**Primary action:** Tap result | **States:** Empty: 'No matches — try gifting or hampers' with category chips  
Simple Postgres full-text in v1; no facets.

## Earn with CeylonPick /earn · v1

**Purpose:** Convince a creator to apply in under a minute; set expectations honestly.

| Section (top → bottom) | Content and components                                                                                                                                      |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Hero                   | 'Your picks. Your page. Your payout.' · Apply button                                                                                                        |
| How it works           | 3 steps: Apply → Get products & your page → Earn 10–20% on delivered orders                                                                                 |
| Trust block            | PayoutCountdown · 'Paid on time' streak · aggregate payout log ('LKR 184,300 paid to 27 creators since launch') · Founding Creators wall (avatars, handles) |
| Rules (plain language) | Delivered + 7 days · 1st and 16th · min LKR 2,000 · 30-day cookie · RTO rule · disclosure                                                                   |
| Earnings example       | Interactive: slider 'orders per month' × average commission → monthly estimate (honest ranges)                                                              |
| FAQ                    | 8 questions                                                                                                                                                 |
| Apply form             | Handle · platform · followers · niche · language · phone · sample link                                                                                      |

**Primary action:** Apply | **States:** Form validation inline; success screen 'We reply within 48 h on WhatsApp'

This page is the marketing funnel's landing page — measure its conversion weekly.

## Sell with us /sell · v1

**Purpose:** Recruit verified makers; filter out resellers.

| Section (top → bottom) | Content and components                                                                                             |
|------------------------|--------------------------------------------------------------------------------------------------------------------|
| Hero                   | 'Made here. Sold by people who care.' · Apply                                                                      |
| Why                    | Curated shelf (≤ 50 SKUs per niche) · creator distribution · paid every Friday · packing-photo protection          |
| What we verify         | NIC/BR · product sample · video call · quality standard (link)                                                     |
| Fees                   | Plain table: creator commission 10–20% (you choose) · platform 6% · gateway ~3% on prepaid · courier paid by buyer |
| Apply form             | Business name · maker name · NIC/BR · products · photos (3) · social links · district · phone                      |

**Primary action:** Apply | **States:** Success: 'We call within 3 working days'

Resellers/import shops are told 'not a fit' on the page itself to save everyone time.

## How it works / About · Policies /how-it-works · /about · /policies/\* · v1

**Purpose:** Answer trust questions before support has to.

| Section (top → bottom) | Content and components                                                                                    |
|------------------------|-----------------------------------------------------------------------------------------------------------|
| How it works           | Buyer / creator / maker tabs; the 3-step diagram; OTP explanation; delivery map of covered districts      |
| About                  | Founder name, photo, 200 words, contact; 'Why verified matters'                                           |
| Policies               | Shipping & delivery · Returns (damaged/wrong only) · Privacy (3 languages) · Creator terms · Vendor terms |

**Primary action:** Contact on WhatsApp | **States:** Static pages

All three languages from day one.

## 5. Buyer Pages

### Cart /cart · v1

**Purpose:** Confirm items and see the total including delivery before checkout.

| Section (top → bottom) | Content and components                                                                                          |
|------------------------|-----------------------------------------------------------------------------------------------------------------|
| Items                  | Thumb · title · variant · qty stepper · line total · remove                                                     |
| Single-vendor notice   | If items from 2 makers: 'These come from two makers and will be two orders/deliveries' (auto-split at checkout) |
| Totals                 | Subtotal · delivery estimate (by district cookie) · total                                                       |
| CreatorBanner          | If present                                                                                                      |
| Action                 | Checkout (full width)                                                                                           |

**Primary action:** Checkout | **States:** Empty: 'Your cart is empty' + 'See creator picks'

Cart stored in cookie/localStorage-equivalent server session keyed by phone after first order.

### Checkout (3 steps, one page, accordion) /checkout · v1

**Purpose:** Collect the minimum to deliver; make COD and prepaid equally easy; never surprise the buyer.

| Section (top → bottom)    | Content and components                                                                                                                                                                                                                                |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Progress                  | Step 1 Details · Step 2 Payment · Step 3 Confirm                                                                                                                                                                                                      |
| Order summary (collapsed) | Items, subtotal, delivery fee (final once district chosen)                                                                                                                                                                                            |
| Step 1 — Details          | Phone (identity; format hint 07X XXX XXXX) · AddressForm · 'Save for next time' implicit                                                                                                                                                              |
| Step 2 — Payment          | Radio: Cash on delivery — 'We'll send a 6-digit code to confirm your order' · Card / bank / wallet — 'Secure PayHere checkout'. Items marked prepaid-only hide COD with explanation. COD hidden above cap (LKR 5,000 / 3,000 beauty) with explanation |
| Creator code              | Auto-filled from cookie; editable; shows creator name when valid                                                                                                                                                                                      |
| Totals & Place order      | Total in bold · button 'Place order' (COD) or 'Pay LKR 3,250' (prepaid)                                                                                                                                                                               |
| Trust footer              | Verified maker · packing photo on request · WhatsApp support number                                                                                                                                                                                   |

**Primary action:** Place order / Pay | **States:** Inline validation; district unknown → fee 'calculated at next step'; PayHere redirect shows 'Taking you to secure payment...'

No account creation, no email required. Address fields are optional except phone, name, address, district.

### OTP confirmation (COD) /checkout/confirm · v1

**Purpose:** Convert a COD intent into a confirmed order without friction or confusion.

| Section (top → bottom) | Content and components                                                                                                  |
|------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Header                 | 'Confirm your order'                                                                                                    |
| Explanation            | 'We sent a 6-digit code to 07X XXX 4521. Why? So couriers only travel for real orders — it keeps delivery fees low.'    |
| OtpInput               | 6 boxes; numeric keypad; paste                                                                                          |
| Actions                | Confirm · Resend (60 s timer, max 3) · Wrong number? (edit phone)                                                       |
| Success                | 'Order CP-10231 confirmed. Nimali is packing it.' · tracking link · 'We'll message you on WhatsApp' · Order again later |

**Primary action:** Confirm | **States:** Wrong code: 'That code didn't match — 2 tries left' · Expired: 'Code expired — resend' · 3 fails: order cancelled with explanation and 'Try again'

This screen is the biggest COD drop-off risk; copy is tested first in v1.1.

### Payment result (prepaid) /checkout/payment-status · v1

**Purpose:** Handle the PayHere return without confirming from the browser.

| Section (top → bottom) | Content and components                                                                             |
|------------------------|----------------------------------------------------------------------------------------------------|
| Pending                | 'Payment received — confirming with the bank...' spinner-free skeleton, polls every 2 s up to 60 s |
| Success                | Same success block as OTP                                                                          |
| Failed                 | 'Payment didn't go through. Nothing was charged.' · Try again · Switch to COD (if eligible)        |

**Primary action:** Track order | **States:** Timeout: 'Taking longer than usual — we'll WhatsApp you as soon as it's confirmed'  
 Never shows 'confirmed' before the server has the IPN.

## Order tracking /track/{number} · v1

**Purpose:** Answer 'where is my order' without a support message; open dispute window at the right time.

| Section (top → bottom) | Content and components                                            |
|------------------------|-------------------------------------------------------------------|
| Header                 | Order number · StatusChip · ETA line                              |
| OrderTimeline          | With timestamps; packed step shows packing photo thumbnail        |
| Courier block          | Courier name · tracking no. · 'Call rider' (if provided)          |
| Items & amount         | Lines · 'Pay LKR 3,250 on delivery' or 'Paid'                     |
| Maker & creator        | 'From Nimali (Matale) · Picked by @name'                          |
| Problem                | 'Report a problem' visible from DELIVERED for 48 h → dispute form |
| Actions                | Order again · WhatsApp support                                    |

**Primary action:** — | **States:** Not found: 'We can't find that order — check the number in your WhatsApp message'  
 Accessible from WhatsApp link without login (number + phone hash).

## Dispute form /track/{number}/problem · v1

**Purpose:** Collect evidence quickly and set expectations.

| Section (top → bottom) | Content and components                                               |
|------------------------|----------------------------------------------------------------------|
| Reason                 | Radio: damaged · wrong item · missing item · other                   |
| Evidence               | PhotoCapture (1–3 photos, required)                                  |
| Note                   | Optional 200 chars                                                   |
| Submit                 | 'We reply within 24 h. The maker's packing photo is used to decide.' |

**Primary action:** Submit | **States:** Window closed: 'The 48-hour window has passed — contact us on WhatsApp'

—

## My orders /me · v1

**Purpose:** Let a returning buyer reorder and track without an account.

| Section (top → bottom) | Content and components                                                              |
|------------------------|-------------------------------------------------------------------------------------|
| Login                  | Phone → OTP (reuses OtpInput)                                                       |
| List                   | Order cards: number · date · StatusChip · first item thumb · amount → tracking page |
| Reorder                | 'Order again' on delivered orders                                                   |
| Preferences            | Language · WhatsApp updates toggle · saved address                                  |

**Primary action:** Order again | **States:** Empty: 'No orders yet — see creator picks'

—

## 6. Creator Area

Figure 3 — Wireframes: creator dashboard, vendor dashboard, admin dashboard.

### Creator dashboard /creator · v1

**Purpose:** Answer 'how much am I owed, when, and what should I share today' in one screen.

| Section (top → bottom) | Content and components                                                                |
|------------------------|---------------------------------------------------------------------------------------|
| Money card (top, teal) | 'You will receive LKR 12,450 on Fri 16 Sep' · PayoutCountdown · 'paid on time' streak |
| Share block            | Storefront link (copy) · code (copy) · WhatsApp share · QR                            |
| Funnel row             | 7-day: Clicks → Confirmed → Delivered → Paid (NumberCards, 2x2 on mobile)             |
| Health line            | RTO 7% ✓ (pause at 30%) · unconfirmed 9%                                              |
| Top product            | Product · orders · 'Share this'                                                       |
| Recent orders          | List with StatusChips (no buyer identity beyond district)                             |
| Shortcuts              | Edit picks · Statements · Campaign Board (v2)                                         |

**Primary action:** Copy link / Share | **States:** New creator: money card shows 'Your first payout will show here' + 'Add 3 picks' checklist  
Weekly brief from founder appears as a dismissible card at the top on Wednesdays.

### Links & codes /creator/links · v1

**Purpose:** Generate product-specific links and see which ones work.

| Section (top → bottom) | Content and components                                                                       |
|------------------------|----------------------------------------------------------------------------------------------|
| Default                | Storefront link · personal code                                                              |
| Per-product            | Search product → generate link; table: product · clicks · confirmed · delivered · commission |
| UTM helper             | Optional platform tag (tiktok/ig/yt) appended for the creator's own analysis                 |

**Primary action:** Copy | **States:** Empty: 'Generate your first product link'

### My picks (storefront editor) /creator/picks · v1

**Purpose:** Curate the public storefront.

| Section (top → bottom) | Content and components        |
|------------------------|-------------------------------|
| Preview toggle         | See storefront as visitors do |

| Section (top → bottom) | Content and components                                       |
|------------------------|--------------------------------------------------------------|
| Picks list             | Drag to reorder · 1-line 'why I love it' (80 chars) · remove |
| Add pick               | Search catalog; shows commission % per product               |
| Profile                | Cover, avatar, bio, social links                             |

**Primary action:** Add pick | **States:** Empty: 'Add your first pick — here are this week's featured products'

Max 24 picks in v1.

## Orders /creator/orders · v1

**Purpose:** Understand which orders will pay and which failed, and why.

| Section (top → bottom) | Content and components                                                                                                         |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| Filters                | Status · date range · product                                                                                                  |
| List                   | Order no. (masked) · date · product · amount · StatusChip · commission (grey until SETTLED) · 'why' tooltip on RTO/unconfirmed |

**Primary action:** — | **States:** Empty: 'Orders from your links will appear here'

No buyer names or phones shown to creators.

## Payouts & statements /creator/payouts · v1

**Purpose:** Trust: show exactly what was paid, when, for which orders.

| Section (top → bottom) | Content and components                                          |
|------------------------|-----------------------------------------------------------------|
| Next payout            | Amount · date · 'includes N orders settled by {date}'           |
| History                | Payout cards: date · amount · bank ref · download PDF statement |
| Statement detail       | MoneyLines per order: product price → commission %; totals      |
| Bank details           | Masked account · edit (OTP required)                            |

**Primary action:** Download statement | **States:** Empty: 'Your first payout is scheduled for {date}'

—

## Campaign Board /creator/campaigns · v2

**Purpose:** Pick vendor-funded campaigns with samples.

| Section (top → bottom) | Content and components                                        |
|------------------------|---------------------------------------------------------------|
| Open campaigns         | Cards: product · commission · samples left · window · 'Apply' |
| My campaigns           | Applied / approved / posted status; brief link; deadline      |

**Primary action:** Apply | **States:** Empty: 'No campaigns right now — the weekly brief has this week's focus'

v2 (M4 manual via WhatsApp, M6 in-app).

## Apply & profile /creator/apply · /creator/profile · v1

**Purpose:** Onboard and maintain identity/bank details.

| Section (top → bottom) | Content and components                                                                                      |
|------------------------|-------------------------------------------------------------------------------------------------------------|
| Apply                  | Same form as /earn                                                                                          |
| Profile                | Name · handle · phone · languages · bank details (masked) · notification preferences · terms acceptance log |

**Primary action:** Save | **States:** —

—

## 7. Vendor Area

### Vendor dashboard — Today /vendor · v1

**Purpose:** Tell the maker what to do today and what they will be paid.

| Section (top → bottom)  | Content and components                                      |
|-------------------------|-------------------------------------------------------------|
| Action card (top, teal) | 'Orders to pack today: 7' · Start packing                   |
| Money                   | Payable balance · next payout Friday date · PayoutCountdown |
| Alerts (amber)          | Stock low items · orders waiting > 24 h · open dispute      |
| Health                  | RTO on my orders · average pack time · rating (v2)          |
| Recent orders           | StatusChips                                                 |
| Shortcuts               | Products · Statements · Verification status                 |

**Primary action:** Start packing ✓ | **States:** New vendor: checklist card 'Add 10 products · Add bank details · Your verification is complete'

### Pack flow /vendor/pack · v1

**Purpose:** Pack orders one at a time on a phone, with photo evidence, in under 60 seconds each.

| Section (top → bottom) | Content and components                                                                                                                            |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| Card per order         | Order no. · items with variant/qty (large) · buyer district only · COD/prepaid tag · special note                                                 |
| PhotoCapture           | Required; shows guidance overlay: 'Show items and the order slip'                                                                                 |
| Mark packed            | Disabled until photo present; success tick; auto-advance to next                                                                                  |
| Batch end              | '7 packed. Courier pickup: today 3 pm. Print/Show slips' → order slips view (printable list with order no., buyer name/phone/address, COD amount) |

**Primary action:** Mark packed | **States:** No orders: 'Nothing to pack — enjoy the day'

Buyer address appears only on the printable slip, not on the pack card, to keep screens simple and private.

### Orders /vendor/orders · v1

**Purpose:** Find any order and its state; enter tracking when the courier has no API.

| Section (top → bottom) | Content and components                                                                                    |
|------------------------|-----------------------------------------------------------------------------------------------------------|
| Filters                | Status · date · COD/prepaid                                                                               |
| List                   | Order no. · date · items · amount · StatusChip · action (Enter tracking no. / Request cancel with reason) |
| Detail drawer          | Timeline · packing photo · buyer district · dispute (if any) with evidence and admin decision             |

**Primary action:** Enter tracking | **States:** Empty: 'No orders yet — share your products with creators'

Cancel requests go to admin; button explains 'counts as a strike'.

### Products /vendor/products · v1

**Purpose:** Keep stock and prices accurate with minimum taps.

| Section (top → bottom) | Content and components                                                                                                                  |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| List                   | Thumb · title · price · stock (tap to edit inline) · status chip (Live / Draft / Paused)                                                |
| Edit sheet             | Title · description · price · variants · stock · COD allowed / prepaid-only · images (upload via pre-signed URL) · category · lead time |
| Creator commission     | Slider 10–20% with live 'creator earns LKR X per order' preview                                                                         |
| Publish                | Sends to admin moderation (new products only)                                                                                           |

**Primary action:** Update stock | **States:** Empty: 'Add your first product — we'll photograph it if you send samples'

Max 15 SKUs in phase 1 (enforced with explanation).

## Payouts & statements */vendor/payouts · v1*

**Purpose:** Show every rupee: price → creator commission → platform fee → gateway fee → yours.

| Section (top → bottom) | Content and components                                                      |
|------------------------|-----------------------------------------------------------------------------|
| Next payout            | Amount · Friday date · orders included                                      |
| History                | Payout cards with bank ref · PDF statement                                  |
| Statement detail       | MoneyLines per order; RTO fees shown as separate lines with order reference |
| Bank details           | Masked; edit requires OTP                                                   |

**Primary action:** Download statement | **States:** Empty: 'First payout Friday after your first delivered order settles'

—

## Apply & profile / Verification */vendor/apply · /vendor/profile · v1*

**Purpose:** Onboarding and identity.

| Section (top → bottom) | Content and components                                                                    |
|------------------------|-------------------------------------------------------------------------------------------|
| Apply                  | Same as /sell                                                                             |
| Verification status    | Steps: documents received → sample received → call done → Verified; date and badge        |
| Profile                | Maker story text · photo · district · contact · pickup address · bank details · terms log |

**Primary action:** Save | **States:** —

—

## 8. Admin Area (desktop-first)

### Ops & KPI dashboard /admin · v1

**Purpose:** Run the business from one screen in a 30-minute Monday review and 5-minute daily check.

| Section (top → bottom) | Content and components                                                                                                                                                       |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Row 1 — NumberCards    | Delivered this week vs target · RTO 7d/30d · Contribution margin per order · Payouts due Friday (amount)                                                                     |
| Row 2 — QueueButtons   | Awaiting pickup · OTP unconfirmed > 12 h · Disputes open · Vendors awaiting verification · Creators awaiting approval · Remittance exceptions · Products awaiting moderation |
| Row 3 — Ledger check   | 'Bank LKR X = Held + Revenue – Payouts' with green/red badge and difference; link to ledger                                                                                  |
| Row 4 — Orders table   | Filters: status · vendor · creator · payment · date; columns: no., date, vendor, creator, amount, payment, StatusChip, age in state; row → order drawer                      |
| Sidebar                | Orders · Vendors · Creators · Disputes · Ledger · Payouts · Remittance · Products · Settings                                                                                 |

**Primary action:** Open a queue | **States:** Loading skeletons per card; ledger mismatch shows red with 'Investigate' → exceptions

Mobile view: rows 1–2 only, stacked.

### Order detail (drawer / page) /admin/orders/{id} · v1

**Purpose:** See everything about one order and intervene safely.

| Section (top → bottom) | Content and components                                                                                                                                              |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Header                 | Order no. · StatusChip · payment · vendor · creator · buyer (name, phone, address)                                                                                  |
| Timeline               | Full history with actor and reason                                                                                                                                  |
| Evidence               | Packing photo · dispute photos · OTP attempts · IPN log (prepaid)                                                                                                   |
| Money                  | Ledger entries for this order (read-only)                                                                                                                           |
| Actions                | Transition to allowed next states only (dropdown shows valid targets) with mandatory reason · Resend OTP · Enter tracking · Cancel with refund (prepaid) · Add note |

**Primary action:** Transition with reason | **States:** —

Invalid transitions are not offered — the UI mirrors the state machine.

### Vendors /admin/vendors · v1

**Purpose:** Verify, monitor, and manage makers.

| Section (top → bottom) | Content and components                                                                                             |
|------------------------|--------------------------------------------------------------------------------------------------------------------|
| Queue                  | Applications: name · district · products · documents ✓ · sample ✓ · call scheduled · 'Verify' / 'Decline (reason)' |
| List                   | Vendors: status · SKUs · orders 30d · RTO · payable · strikes                                                      |
| Detail                 | Profile · documents (secure view) · products · orders · payouts · notes · suspend/reactivate                       |

**Primary action:** Verify | **States:** Empty queue: 'No applications waiting'

—

### Creators /admin/creators · v1

**Purpose:** Approve and monitor creators; act on RTO.

| Section (top → bottom) | Content and components                                                                             |
|------------------------|----------------------------------------------------------------------------------------------------|
| Queue                  | Applications with handle links, followers, niche, language; Approve / Decline                      |
| List                   | Handle · tier · clicks 7d · delivered 30d · RTO 30d (red > 30%) · payable · status (Active/Paused) |
| Detail                 | Storefront preview · orders · payouts · pause/reactivate with reason · seeding log                 |

**Primary action:** Approve | **States:** —

Auto-paused creators appear at top with the trigger explained.

**Disputes** /admin/disputes · v1**Purpose:** Decide within 24 hours with evidence side by side.

| Section (top → bottom) | Content and components                                                                                                                                                                           |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| List                   | Open first; age; order; reason                                                                                                                                                                   |
| Detail                 | Buyer photos vs vendor packing photo side by side · notes · decision buttons: Reject (settle) · Refund (prepaid) · Return/RTO (COD) — each with reason and message templates to buyer and vendor |

**Primary action:** Decide | **States:** Empty: 'No open disputes'

—

**Ledger** /admin/ledger · v1**Purpose:** See balances and prove the bank matches.

| Section (top → bottom) | Content and components                                                                                                     |
|------------------------|----------------------------------------------------------------------------------------------------------------------------|
| Balances               | Cards per account type; per-vendor and per-creator payable tables                                                          |
| Transactions           | Filter by kind, order, date; each shows balanced entries                                                                   |
| Reconciliation         | Bank balance input (manual, from statement) → computed difference → exceptions list (unremitted shipments, unmatched IPNs) |
| Adjustment             | Create ADJUSTMENT txn with memo (admin only, double confirm)                                                               |

**Primary action:** Run reconciliation | **States:** —

Read-only except adjustments.

**Payouts** /admin/payouts · v1**Purpose:** Pay everyone on the published day in three clicks.

| Section (top → bottom) | Content and components                                                                  |
|------------------------|-----------------------------------------------------------------------------------------|
| Preview                | Period · payees above minimum · amount · orders included; exclusions listed with reason |
| Approve                | Locks the run; generates bank bulk-transfer CSV                                         |
| Mark paid              | Upload/enter bank references → PAYOUT transactions posted → notifications sent          |
| History                | Runs with totals and statements                                                         |

**Primary action:** Approve run | **States:** —

Countdown to next payout day shown at top; overdue turns red.

**Remittance import** /admin/remittance · v1**Purpose:** Match courier COD cash to orders.

| Section (top → bottom) | Content and components                                                                     |
|------------------------|--------------------------------------------------------------------------------------------|
| Upload                 | Courier · CSV file · preview parsed rows                                                   |
| Matching               | Auto-matched (green) · unmatched (amber) with manual match search · mark as fee/adjustment |
| Post                   | Creates REMITTANCE transaction; exceptions remain listed                                   |

**Primary action:** Post remittance | **States:** —

—

**Products moderation · Settings** /admin/products · /admin/settings · v1**Purpose:** Keep the shelf curated and the rules editable.

| Section (top → bottom) | Content and components                                                                                                                                                                         |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Moderation queue       | New/changed products: images, copy, price, category · Approve / Request changes                                                                                                                |
| Settings               | COD cap (global, per category) · platform commission · payout days and minimums · OTP rules · courier list · message templates (EN/SI/TA) · occasion banner · kill switch (disable new orders) |

**Primary action:** Approve | **States:** —

Settings changes are logged with actor.

## 9. States, Errors and Copy Rules

| Situation           | Pattern                                                              | Example copy (EN; SI/TA written natively)                              |
|---------------------|----------------------------------------------------------------------|------------------------------------------------------------------------|
| Loading             | Skeletons shaped like the content; never a full-page spinner         | —                                                                      |
| Empty list          | Illustration + one sentence + one action                             | 'No orders yet. Share your link to get your first one.' [Copy link]    |
| Field error         | Inline under field, red text, field border red; button stays enabled | 'Enter a Sri Lankan mobile number (07X XXX XXXX)'                      |
| Action failed       | Inline near the button + retry; keep user input                      | 'Couldn't place the order. Your details are saved — try again.'        |
| Money waiting       | Grey amount with reason chip                                         | 'LKR 450 · pays after delivery + 7 days'                               |
| Money failed        | Red chip with plain reason                                           | 'Not paid · order returned (RTO)'                                      |
| Trust moments       | Explain the why in one line                                          | 'Why a code? So couriers only travel for real orders.'                 |
| Destructive actions | Confirm sheet with consequence stated                                | 'Cancel this order? The buyer will be told and it counts as a strike.' |
| Success             | Toast 3 s + next step                                                | 'Packed ✓ — next order' / 'Order confirmed. Nimali is packing it.'     |
| Offline             | Banner; queue photo uploads for retry                                | 'You're offline. We'll upload the photo when you're back.'             |

### Copy principles

- Name people: makers by first name and district, creators by handle. Never 'the seller' or 'the merchant'.
- Money with currency and thousands separator always: 'LKR 12,450', never '12450.00'. Dates in words: 'Fri 16 Sep'.
- One idea per sentence; verbs first on buttons ('Place order', 'Copy link', 'Mark packed').
- No exclamation marks in system messages; no 'Oops'. Say what happened and what to do.
- Status names shown to buyers are friendly ('On its way'); internal state names appear only in admin.

### Buyer-facing status labels

| Internal state        | Buyer label                  | Chip colour |
|-----------------------|------------------------------|-------------|
| PLACED / AWAITING_OTP | Waiting for your code        | Amber       |
| AWAITING_PAYMENT      | Waiting for payment          | Amber       |
| CONFIRMED             | Confirmed — being packed     | Blue        |
| PACKED                | Packed                       | Blue        |
| SHIPPED               | On its way                   | Blue        |
| DELIVERED             | Delivered                    | Green       |
| SETTLED               | Delivered                    | Green       |
| DISPUTED              | Problem reported — reviewing | Red         |
| RTO                   | Returned to maker            | Red         |
| CANCELLED             | Cancelled                    | Grey        |
| REFUNDED              | Refunded                     | Grey        |

## 10. Front-End Build Order (maps to the 8-week plan)

| Week | Pages / components                                                                                                                        |
|------|-------------------------------------------------------------------------------------------------------------------------------------------|
| 1    | Design tokens, AppHeader, BottomNav, ProductCard, VerifiedBadge, StatusChip, NumberCard, EmptyState, /design showcase route, PWA manifest |
| 2    | Home, Category, Product, Search, Sell with us                                                                                             |

| Week | Pages / components                                                                                                                               |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| 3    | Cart, Checkout (COD path), OTP confirmation, Order tracking                                                                                      |
| 4    | Checkout (prepaid path), Payment result, Policies/How it works/About                                                                             |
| 5    | Admin: Ops & KPI dashboard, Orders table + drawer, Ledger, Remittance import, Payouts                                                            |
| 6    | Creator storefront, Earn page + apply, Creator dashboard, Links, Picks, Orders, Payouts                                                          |
| 7    | Vendor Today, Pack flow with PhotoCapture, Orders, Products, Payouts; Dispute form; Admin Vendors/Creators/Disputes                              |
| 8    | SI/TA strings, empty/error states pass, performance budget (LCP < 2.5 s on mid-range Android), accessibility pass, Settings, Products moderation |
